# Team Up Your Security

## Collaboration is hard. We make it easy.

Empower your IT and cybersecurity teams with vRx's effective and streamlined user management.

Keep users aligned using a flexible and centralized management structure. Have the freedom to easily add, create, and manage operations teams and stakeholders all from your dashboard.

## Create & Manage Teams

With vRx's streamlined user-management, creating groups, adding users, and sharing or restricting information couldn't be easier.

## Define Roles & Permissions

Empower managers across your organization to streamline operations based on their team's specific needs and permissions. Ensure user access to actions and the necessary data and information to fullfill their role.

## Manage Multiple Customers

Organize a top-down view of all of your customers from one dashboard. Create and assign specialized teams to individual clients. Follow and track their accomplishments.

# vRx
# Team Users

### Owner

Full access and control from top to bottom. The owner manages and operates the vRx account as a whole. Create teams and assign levels of access to individual users.

### Admin

Admins operate all security and IT tasks, view data, control assets, and perform functions within the team(s) and domain(s) they've been assigned. Admins can manage users and assets within their team.

### Viewer

Within their team, viewers are able to access the assembled security data and information that corresponds with the assets they've been assigned.

## Multi-Site Management

Streamline the way you track, prioritize, remediate and automate actions across different sites, whether you might be the manager of a large security service provider or an operations team manager in a corporate environment. With vRx, you can maximize your operational efficiency by streamlining the management of diverse teams and clients while encouraging a collaborative environment.

### 01

### Cross Organization Remediation

Automate solutions for common security problems across the organizations under your guard, and do it all with one click. Catalogue all of the assets and applications for all of your customers in real-time.

### 02

### Customer Activity Tracking

Maintain a real-time, granular overview of every digital environments under your protection. Get all the capabilities of a fully-outfitted control center from one dashboard and leave no stone unturned.

### 03
